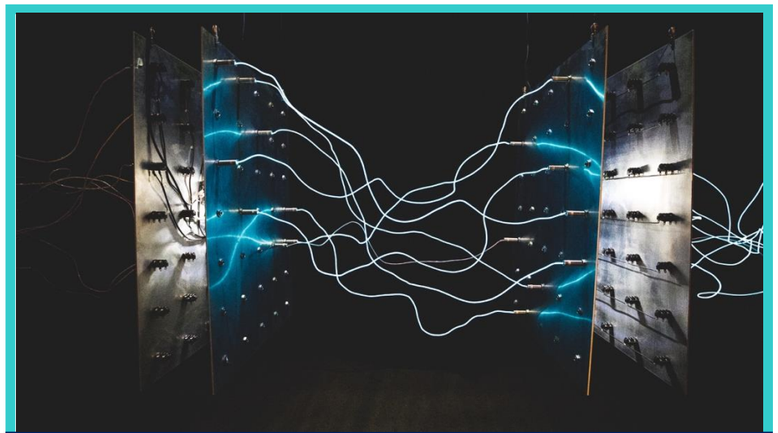
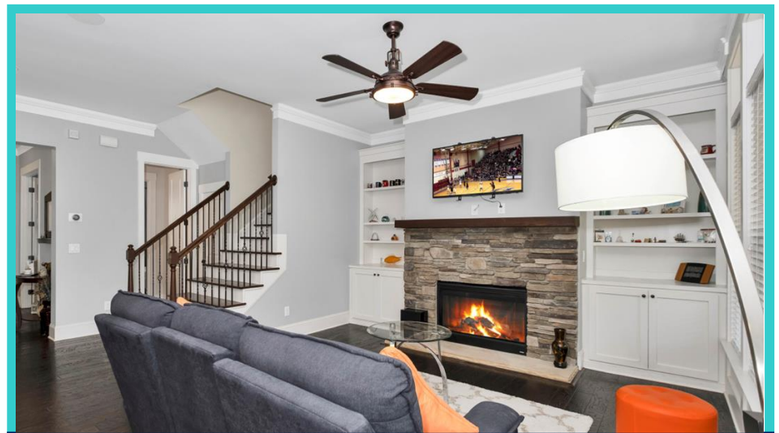
sse | For a better world of energy

Knowledge Organiser

Energy gives people, animals and appliances the power to function every day.



Electricity is a type of energy that powers many of our devices and appliances e.g. at home and school



Consumption is when we use energy to do different things e.g. travel, exercise, cook and heat our homes

Energy is often generated by burning natural resources in ***power stations***.

Wind turbines use energy from the wind to generate electricity – a group of wind turbines is called a wind farm.

Electricity is passed along wires help up by ***transmission towers***.
