LEARNING FROM THE PAST

Problems and solutions

Step 4 – I explore problems by creating different possible solutions

Knowledge Organiser

When something is difficult to deal with or understand, or even if it is dangerous, it is known as a ***problem***.

A ***solution*** is when a problem is solved or a difficult situation is dealt with.

A time that has already happened is known as the ***past*** but if it happening now, it is the ***present.***

These wind turbines are ***similar*** to each other. A ***similarity*** is that they almost have the same shape.

A ***difference*** explains how two things are not the same. A difference between these trees is the colour of its leaves.

Technology is when something is used to solve a problem. An example is a lightbulb which lights up a dark space.
