central

Enjoy enhanced security, control and transparency in your origination process.

PointCentral® equips you with the end-to-end solution you need to maintain control, ensure accuracy, and prevent unauthorized changes across multiple locations. PointCentral enables your staff to work on individual components of a single file while maintaining data integrity via a single, centralized database.

Control
Configure access rights for multiple locations, users, and user roles.

Accuracy
Decrease errors with customized trigger warnings and compliance rules.

Security
Ensure files are locked on the server when downloaded and removed from users' local workstations when uploaded, through automatic file synchronization.

- Detailed audit trail
- Business rules and conditions for quality and compliance
- Company-wide file storage and document management
- Configure access rights for multiple locations, users and user roles
- Integrated product and pricing engine
- Third-party hosting
- Seamless integration with over 200 vendors
- Server-based for centralized file access
- Unlimited live support
