

# Integrated Registration Options

By choosing **iDonate.ie** to develop your registration platform, your cause can ensure a smooth, seamless journey for fundraisers, from start to finish. Providing a ready-made iDonate page increases the likelihood that the participant will fundraise, helping causes to raise more from their campaigns. View our outlined option below.

1.

Supporter registers to join your charity's VHIWMM team.

2.

An activation link is sent to the supporters email address.

3.

They click the link to activate their page and can start fundraising.

## Option 1

iDonate can create a bespoke registration form for your charity, which will enable supporters to join your VHIWMM team on iDonate.ie. Following registration, the registrant will get an email with a link to activate their iDonate fundraising page. Once the page is activated, they can start fundraising straight away. The fee for a bespoke iDonate reg form is €250.

## Option 2

If your cause already has a registration form for the Mini Marathon, iDonate can integrate with this form to ensure that a fundraising page is automatically generated for registrants.

There are 2 ways in which this can be done:

1. Your cause simply adds a 'Click here to activate your iDonate page' link to a confirmation page/email. This link sends the user to iDonate and passes their name/email in the link. After clicking the link, the user receives an email from iDonate to confirm that their fundraising page is live.
2. A more advanced integration option - your web developer adds some code to connect with iDonate in the background. This will also auto generate a fundraising page on iDonate.
